

## Germs love moisture

Water and warmth encourage the growth of germs.

You can dry your hands to complete the hand hygiene process.

After lathering with soap and rinsing with warm water, dry your hands thoroughly to eliminate the spread of germs.

A Fresh & Clean managed washroom program is designed to give you peace of mind that your washroom will maintain the highest standards of cleanliness and hygiene [www.washroom.com.au](http://www.washroom.com.au)
